I am an incredibly passionate programmer who has worked on several professional projects in the three years I have worked in the industry, as well as several personal projects and school projects that I am proud of.

EXPERIENCE

ScriptSender LLC., Royal Palm Beach FL— *Software Intern*

April 2023 - April 2024

Collaborated with a team of AI developers to design and implement proprietary software that facilitates the transfer of critical information from General Practitioners to Imaging Centers. Dedicated substantial development time to creating sample datasets for diverse models, ensuring comprehensive testing and validation. Refactored existing code to enhance runtime efficiency, contributing to overall system performance improvements.

Studio Kavod, Orlando FL— *Software Developer (Part Time)*

March 2020 - March 2023

Led the development of a Java-based application at Studio Kavod, designed specifically for school districts to efficiently manage and host events for both national and international audiences at the high school level. Played a key role in the entire software development lifecycle, from initial design and requirements gathering to implementation and deployment. Ensured the application provided robust event scheduling, participant management, and real-time communication features, catering to the unique needs of educational institutions.

EDUCATION

Valencia College, Orlando FL— *Associate's Degree*

September 2020 - December 2022

Pursued an Associate's Degree while balancing part-time work at Studio Kavod and part-time studies. Transitioned to full-time employment at ScriptSender, which led to a temporary pause in academic progress. Currently completing the remaining coursework and set to finish the Associate's Degree at Palm Beach State College (PBSC) this summer.

Suncoast Community High School, Riviera Beach FL— *Diploma w/ Computer Science Focus*

September 2015 - MAY 2019

Was able to finish with a Computer Science Magnet designation.
